HOME OF L. A. MOFFET, MANAGER

SOME OF THE ADVANTAGES OF BUYING FROM *Plumfield Nurseries . . .*

Years of experience in growing Nursery Stock and solving many of your planning problems. A large organization of trained help. Twelve of our employees have a total of 360 years' experience. Improved modern warehouse, ventilated and temperatures controlled, keeping stock in healthy growing condition. Modern equipment enables us to grow Nursery Stock that gives satisfaction to the most particular buyer. Our stock grown at Fremont, Nebraska, in clean, cultivated fields under ideal climatic conditions for replanting. A new Certificate of Inspection from State Inspector each year. Stock handled with the least possible exposure assuring high survival results. Low prices for fine quality guaranteed Nursery Stock.

HOW TO ORDER

Please name second choice. In case we are out of variety or grade wanted, this will help us to make prompt shipment.

PLEASE STATE HOW TO SHIP EXPRESS or FREIGHT CHARGES COLLECT

If mail shipment is desired, add 10% to order unless order is under \$2.00, then add 20c to cover special packing and postage.

Trees over 3 to 4 feet high must travel by Express, Truck or Freight.

Our NURSERY STOCK is grown on the best land in the Platte and Elkhorn valleys. We use modern machinery; have modern FROST-PROOF STORAGE, and life-long TRAINED HELP. Our office and packing grounds are located one block south of U. S. Highway No. 30, on Nye Avenue.

We extend you a personal invitation to visit our NURSERIES AND STORAGEES at any time of the year.

OUR GUARANTEE

Our NURSERY STOCK is guaranteed to reach you in a healthy, growing condition. Stock that fails to show growth will be replaced, if notified by July 1st following delivery. After this date, we will replace at one-half the current price, if notified by October 1st, following delivery, F. O. B. our packing grounds.

Replacements will be made of same size as originally bought. Planting service at cost.

SHORTAGES OR COMPLAINTS MUST BE REPORTED AT ONCE

If any NURSERY STOCK proves untrue to description, we hold ourselves in readiness, on proper proof, to replace it or refund the amount paid, but we shall, in no case be liable for any sum greater than the amount originally received for said NURSERY STOCK.

Plumfield EVERGREENS

SPECIMEN STOCK

We offer one of the finest assortments of Evergreens in the West. They are all transplanted from time to time, to develop the required root system and pruned to give them shape. We invite you to visit our fields and tag out your selection of Evergreens. We have thousands of Evergreens from which to make your selection.

NOTE—Evergreens are dug with ball of earth and burlapped. They will be shipped by freight or truck unless otherwise instructed. Can not be mailed. The burlap, next to the earth, should be left on when planted. Low and spreading types of Evergreens are measured across.

The most popular and hardy Evergreens in the Middle West are the various types of Junipers. In form they vary from those growing flat on the ground to those growing 80 to 100 feet tall.

Our Evergreens are all hardy varieties and will do well any place in the Mid-West. All new varieties introduced by us have been tested for a number of years and have proven very worthy. We have devoted much time in search of better types to propagate for this territory and are proud to offer the trade such good varieties as listed in this catalog, along with some of the older varieties which have been on the market for a number of years and speak for themselves.

DOUGLAS FIR

The Douglas Fir are well known, however, the type listed here differs from the Western type as well as the Northern and Southern types. This one is native of Colorado, stands considerable drought. Foliage is bluish-green, grows 1 to 2 ft. per year, is symmetrical and fairly compact. Makes a nice yard tree, also used extensively for windbreaks.

COLORADO BLUE SPRUCE

SPREADING JUNIPERS
FOR
FOUNDATION
AND
BORDER PLANTINGS
SEE PAGE 8

CONCOLOR FIR

Has silvery toned foliage, dull pointed needles, soft to touch. Grows compact and symmetrical making a very fine tree for the yard. Is also planted for windbreak protection. Will grow 6 to 12 inches a year when established. Ultimate height 50 to 60 feet. Roots deep where soil conditions permit—this habit aids in vigor. Needs little pruning, if any.

**PINUS STROBUS
(White Pine)**

Native of the North and planted extensively in the Middle West. Grows from 12 to 18 inches a year. Ultimate height 60 to 80 feet. Foliage bluish green, needles soft, 2 to 3 inches long.

(Not Available)

**PINUS PONDEROSA
(Bull or Western Yellow Pine)**

Native of North America. Nebraska's only conspicuous native Pine. Has extremely long glaucous needles. Very attractive. Stands almost unlimited drought. Develops into a pyramidal compact tree. Grows ten to fifteen inches a year. Ultimate height 50 to 60 feet.

Not Available

**PINUS REGENSIS SYLVESTRIS
(Scotch Pine)**

This variety has superiority over other Scotch Pines. Very hardy. Grows straight and fast, does well on light, dry soils. Grows from 12 to 18 inches a year. Ultimate height 60 to 80 feet. Foliage light green, needles 2 to 3 inches long, buds brown.

Plumfield **EVERGREENS** Juniper Varieties

JUNIPER CANNARTI

VIRGINIANA CANNARTI, Cannart's Red Cedar. 20-30 ft.

Foliage deep, rich green. Main stem very straight. Branches almost horizontal. Requires shearing to attain compactness.

| | | |
|---------------|---------------|---------------|
| 2-2½ ft. | 2½-3 ft. | 3-3½ ft. |
| \$7.00 | \$8.00 | \$9.00 |

CHINESE JUNIPER

CHINENSIS, Chinese Juniper—A native Juniper of Asia where it covers large areas. The needles are sharp and prickly, light green with a slightly bluish cast. It averages 15 to 20 feet, narrow and columnar cone-like specimens. Recommended for all sections of the country.

NOT AVAILABLE

VIRGINIANA TYPES

VIRGINIANA BLUE RAPIDS (Grafted). 30-40 ft.

Foliage bluish-green color. Leaves not so sharp, growing on stout, coarse, horizontal branches which set close to each other on a straight, rugged, fast-growing stem. Hardy and one of the best grafted Juniper Virginiana varieties. Northern origin. Retains its color in winter.

| | | |
|----------------|----------------|----------------|
| 3½-4 ft. | 4-4½ ft. | 4½-5 ft. |
| \$8.00 | \$9.00 | \$10.00 |

| 2-2½ ft. | 2½-3 ft. | 3-3½ ft. |
| \$7.00 | \$8.00 | \$9.00 |

Plumfield NEW GRAFTED

JUNIPER MOFFETI

Another wonderful tree selected from the Rocky Mountains of Colorado and is a dandy tree. Foliage sharp, light greenish-silver color, tips of branches are more silver. Habit is upright and pyramidal, branches grow close together making a very dense tree. Grows about 12 inches a year. Can be sheared if desired.

JUNIPER WELCHI

The Welchi is the most satisfactory columnar type Scopulorum on the market today. Foliage is a light, evenly mixed greenish-silver. Leaves sharp but lay very close to the stem. Branches are very full and tufted at the base tapering out to a prominent point, yet they are sharply curved upward forming a fine outstanding columnar tree. Grows about one foot a year. Ultimate height 20 to 25 feet. Can be sheared if necessary.

JUNIPER FUNALIS

This variety has (if possible) proved to be more vigorous than most of the Scopulorums. Whipcord, bluish-green foliage. Straight stem with close set branches. Branches grow nearly horizontal but will retain more compactness if sheared once a year. Grows one foot a year. Ultimate height 20 to 30 feet.

Why We Grow Grafted Evergreens

Evergreens, like other varieties of trees, are being improved and we have devoted a number of years producing trees that are outstanding in color and habit of growth. To obtain these results we graft from trees that we have carefully selected and held under observation long enough to prove their superior qualities. Evergreens are often planted in pairs and in many cases one or more pairs are desired on a landscape planting. If grafted types are planted in pairs or in any amount of the same variety they will always grow and look alike. We can assure you that no finer grafted evergreens are produced than we offer in this catalog. The price of grafted evergreens is slightly higher than common seedling types as the cost of producing them is more.

EVERGREENS..... *Fremont, Nebraska*

JUNIPER PATHFINDER

This tree found favor almost instantly by reason of its outstanding silver foliage. It is upright in habit, full at base, limbs curved upward covered with shining silver-blue foliage making it an outstanding tree of the times. Will grow about one foot a year. Ultimate height 20 to 30 feet. You can shear this tree if necessary.

JUNIPER SILVER BEAUTY

A native of the San Isabel Forest region, and truly a beautiful tree. It is upright, full at base, branches have upward trend, foliage is greenish-silver, more silver on the exposed tips of branches. Grows about one foot a year. Ultimate height 20 to 30 feet. Can be sheared if necessary.

JUNIPER FULGENS

This tree is a native of Colorado. Its habit is upright, pyramidal, full at base and grows compact. Bicolor foliage, bluish-green becoming more silver at the ends of the branches. The branches grow more or less opposite, forming flat Arbor Vitae-like limbs. Will grow about one foot a year. Ultimate height 20 to 30 feet. Can be sheared if necessary.

What Scopulorum is and Why it is Desirable

In brief, it is commonly known as Western Red Cedar or Silver Cedar and is native of Nebraska west of North Platte to the Rocky Mountains. Its range north is through the Dakotas and Montana and south into New Mexico. This variety thrives where the annual moisture is only six to eight inches a year. It differs from our local Cedar as the foliage runs more to silver color and as a rule is more symmetrical and compact in habit. It played a very important part in furnishing fence posts and logs for cabins for the Pioneers of the Northern Great Plains States. We find it most useful for this part of the country as it has a great ornamental value as well as for windbreaks and timber lots. You will note that we have selected some fine specimens for propagation and offering many of them as ornamental trees under Grafted Junipers.

GLOBE SCOPULORUM

SEEDLING SCOPULORUM

JUNIPER SCOPULORUM, Globe Shape—Compact globose form of Scopulorum Juniper. Silvery Foliage, very hardy.

| | | | |
|---------------|--------|---------------|--------|
| 12-15 in..... | \$4.50 | 15-18 in..... | \$5.00 |
| 18-24 in..... | | | 6.00 |

SCOPULORUM, Colorado Silver Juniper, 25-30 ft.—Silvery foliage and close symmetrical upright growth. Thrives in hot, dry weather, when the color is the brightest. Very hardy. Grown from seed.

| | | | |
|--------------|---------|--------------|---------|
| 3-3½ ft..... | \$ 7.00 | 3½-4 ft..... | \$ 8.00 |
| 4-4½ ft..... | 9.00 | 4½-5 ft..... | 10.00 |

| 15-18 in..... | \$ 7.50 | 18-24 in..... | \$ 8.50 |
| 2-2½ ft..... | 10.00 | 2½-3 ft..... | 12.50 |

Plumfield SPREADING JUNIPERS

SPREADING JUNIPERS for Foundation and Border Plantings

SABINA JUNIPER

Grows a trifle more upright than Pfitzer with fan-shaped branches. Is equally as hardy and has deep green foliage. Withstands smoky conditions in cities.

| | |
|---------------|--------|
| 18-24 in..... | \$5.00 |
| 2-2½ ft..... | 6.00 |
| 3-3½ ft..... | 8.00 |

TAMARIX JUNIPER

(*Juniperus sabina tamariscifolia*)

A beautiful dwarf. Handsome, light green, lacy foliage resembling the delicacy of the Tamarisk shrub thickly fills the low, creeping plant, forming a dense mat of misty green. You will find it very charming as an edger or in the rock garden.

| | |
|---------------|--------|
| 12-15 in..... | \$3.50 |
|---------------|--------|

PFITZER'S JUNIPER

(*Juniperus chinensis pfitzeriana*)

Exceptionally beautiful, graceful and hardy—no wonder it is one of the most popular. Handsome, leathery, gray-green foliage covers the arching, spreading branches as it develops its broad, picturesque form. Hardy everywhere, and does well in shade as well as sunlight.

| | |
|---------------|--------|
| 18-24 in..... | \$5.50 |
| 2-2½ ft..... | 7.00 |
| 2½-3 ft..... | 8.00 |
| 3-3½ ft..... | 9.00 |

VIRGINIANA ELEGANTISSIMA LEE

Gold Tip

Dark green foliage. Golden tipped, more so in autumn. The natural tendency is to grow low and spreading. Very hardy and desirable, where color is required.

| | |
|---------------|--------|
| 18-24 in..... | \$5.50 |
| 2-2½ ft..... | 6.50 |

**VISIT OUR NURSERIES AND SELECT
YOUR EVERGREENS**

Prostrate and Creeping Junipers for Ground Cover

JUNIPER ADMIRABILIS

This juniper belongs to a specie found in the Rocky Mountains. Its habit of growth is horizontal but it is so compact that it makes a solid mat of evergreen, covering the ground completely. Foliage bluish green. Grows 6 to 8 inches high. Spreads rapidly, yet retains its compactness. A very fine plant to use for covering graves, terraces or any place where a low beautiful covering is wanted.

ANDORRA JUNIPER

A horizontal juniper with grayish-green foliage turning to a reddish purple in early winter. Spreads rapidly, making a fine ground cover eight to ten inches high.

The above Junipers are used for terrace, rock garden and grave covering.

JUNIPER FILICINUS MINIMUS

This pretty little juniper is also a variety of the Rocky Mountains. It is one of the finest foliage evergreens of the juniper family. Its short horizontal limbs covered with delicate small branchlets forming fern shaped branches makes it a gem for the rock garden or any other place that a slow growing prostrate evergreen is desired. Grows 4 to 6 inches high, spreads slowly and is very compact. Green foliage.

JUNIPER LIVIDUS

This is another fine variety of the Rocky Mountain region. Foliage is bluish-green with a silver cast. Branches more slender but very well furnished and does make a remarkable plant. It grows 4 to 6 inches high and spreads reasonably fast, making it very desirable to use.

Available in 10-12 inch Bare Root, Packed in Moss at 65c Each, 4 for \$1.98, Postpaid.

EVERGREENS for Windbreaks . . .

Think of them as matured and the protection they afford against the cold and hot winds. They are everlasting. Our Evergreens are dug fresh from the Evergreen beds at planting time and shipped immediately. The crucial time for Evergreens is usually July and August, following spring planting, therefore, they should be well protected, cultivated, mulched with straw, and watered through this period.

Evergreens cannot be packed with other stock, but will be shipped separate. As a rule the frost does not get out as soon.

TRANSPLANTING—These Evergreens have all been transplanted one or more times. The letter "T" following the size indicates the number of times transplanted. Transplanting is done to develop more fibrous roots which start much faster than large heavy tap roots. This class of stock will give you a better percentage of survival than stock not transplanted. For the fact these cannot be packed with other stock, we will ship **POSTPAID**.

FOREST TREE SEEDLINGS . . .

for Woodlot and Windbreak Plantings

You will be doing a patriotic duty if you will plant trees of the right kind for protection against windstorms, for quick fence posts, for fuel, lumber and wild life coverage. We recommend Chinese Elm backed up with Cedar or Pine for quick and lasting windbreak. Many other varieties are as good or better, but not as fast developing. FOR QUICK FENCE POSTS plant Black Locust. Other varieties are good, but not as fast. FOR QUICK FUEL plant Cottonwood and Maple. For better fuel plant Elm, Ash, Oaks, Honey Locust, Hackberry, etc. FOR LUMBER there are many varieties suitable, but Cottonwood is the fastest lumber if you select the type best suited for your locality. We have a special selected type that has proven to be outstanding. Elms are being made into lumber today right here in Nebraska. Do you know that Nebraska has nearly one thousand Sawmills and our timbers are diminishing rapidly?

Deciduous trees for windbreaks and timber lots, fence lines, lanes, etc. This kind of stock planted in rows on fence lines, and through cultivated field at intervals of 20 to 40 rods will pay greater dividends for the amount of money spent than any other improvement or operation that can be applied to cultivated fields.

Consult us for planting distances and varieties. Also ask your agricultural conservation committee about tree planting credits; it will pay you.

If sent by mail add 20c on less than \$2.00 orders. 10% on orders more than \$2.00. Otherwise we will ship best way, charges collect.

WINDBREAK PLANTING

Plumfield Nurseries **EARLY BEARING DWARF APPLE and PEAR TREES**

Dwarf growing, young bearing fruit trees, are not new; they have been successfully grown in Europe for 200 years and in Eastern United States for 75 years. Are becoming more popular every year. They have many advantages in the small yard and garden, bear young, require less space, can be sprayed and pruned easily. The quality of the fruit is as good or better than fruit grown on standard stocks, and can be harvested without the use of tall ladders.

DWARF APPLE VARIETIES

| SUMMER VARIETIES | FALL VARIETIES | WINTER VARIETIES | |

NEW STANDARD VARIETIES

DELICIOUS CRAB

This Crab Apple was found on the Henry Lass farm near Scribner, Nebraska. Mr. Lass Planted a Delicious apple seed and obtained a Crab apple with Delicious aroma and flavor. This should be tops in a preserving and pickling Crab. We are offering these for the first time. Fruit is large, is greenish yellow with a red stripe and creamy white meat, solid flesh.

PACAL CRAB

Another one of the Mr. John Pacal seedlings. Fruit brilliant red and of good size for a Crab apple. Flesh very solid. This is a good jelly and pickling Crab and we think it is worthy of space where Crab apples are desired. Bears abundantly. Orchardists who have seen these Pacal trees are very enthused with them.

PACAL SUMMER DELICIOUS

A new variety offered for the first time. Parent tree at Weston, Nebraska. Grown from a seed planted by Mr. John Pacal. This tree bore crops for the past several years, having survived the fall freeze of 1940, proving its hardiness. Apples of large size, red, slightly striped, very delicious flavor and aroma of the Delicious. Ripens in September. Bears quite young. Truly a fine apple.

Plumfield Apples

SOLID RED DELICIOUS

One of the most used fruits in the world. Can be easily grown, and should be planted extensively. Varieties we are listing are of the best sorts and recommended for this locality. You may make a selection of varieties and obtain quantity prices on Apples.

SUMMER VARIETIES

ANOKA—July to August. This variety fruits very young. Red and yellow striped.

DUCHESS—August. An old variety, but still one of the best. A good cooking apple.

EARLY HARVEST—July. The earliest summer apple. Pale yellow fruit.

EARLY McINTOSH—Two weeks later than Yellow Transparent. Handsome red color and pleasing taste. Good quality.

RED DUCHESS—All red color. Season and quality same as Duchess.

RED JUNE—Late July. Medium size, round, deep red fruit.

YELLOW TRANSPARENT—July to August. Fruits quite young. Large clear yellow.

FALL VARIETIES

FAMEUSE or SNOW—August. Light red fruit; delicious flavor.

WEALTHY—Early September. One of the old standard varieties. Bears young and is very hardy.

WINTER VARIETIES

CORTLAND—Deep red. Good commercial variety. Comes into bearing young.

DARK RED JONATHAN—The new dark red Jonathan. Colors two to three weeks earlier than Jonathan, and a deeper red.

RED DELICIOUS—Solid red. One of the most popular apples. Fruit large, flesh white, tender and juicy.

GRIMES GOLDEN—Rich golden color. An extra good all-round apple.

HARALSON—Solid red. Fruit is of excellent quality, and a good keeper.

| | Each | Lots of 4 each | Lots of 8 each | Lots of 12 each |
|---------------------------------------|--------|----------------|----------------|-----------------|

THESE PRICES APPLY TO ALL VARIETIES OF APPLES AND CRAB APPLES AS LISTED BELOW.

WINTER VARIETIES, Continued

JONATHAN—Red. The best apple of all. Should be included in every planting.

PRAIRIE SPY—Wealthy shape, color red over yellow ground. Ready for use about Christmas. Very good quality and keeper. This apple has great promise.

NORTHWESTERN GREENING—Yellowish green. Flesh crisp and juicy. Very hardy.

WEALTHY

STAYMEN WINESAP—Deep red. Good commercial variety.

WINESAP—Crimson. A medium sized apple of fine flavor.

YELLOW DELICIOUS—Golden yellow. Sweet, spicy flavor.

CRAB APPLE

DOLGO—Fiery red. Bears young and abundantly. Tree very ornamental.

WHITNEY—Light yellow striped red. Large fruit.

DOLGO

Other varieties of fruits, see pages 12 to 17.

Plumfield FRUIT TREES

Apricots

Apricots bloom early and many times are caught by frost. Heavy mulching after the ground freezes solid will retard their early blooming.

CHINESE—Yellow. Large fruit, and very hardy.

MOORPARK—Orange-yellow. Fruit large, with rich, sweet, flavor.

"MANCHURIAN APRICOTS." Professor Hansen's Hybrids, Brookings, South Dakota.

MANCHU—Large yellow blushed red. Crop very heavy. Hardy.

SCOUT APRICOT—A Morden Manitoba, Canada, production. Bears well. Fruit bronze gold color. Flesh yellow, freestone, tender, free of fibre and thin skinned. Very hardy.

SCOUT APRICOT

| 7/16 in. caliper, 3-4 ft..... | 1.00 | .95 |

Cherries

There is no fruit tree more profitable than the Cherry, especially the sour varieties, which are very desirable for pies and canning. They bear fruit very soon after planting and bring good returns on your investment. Cherries are easily raised, as they are adaptable to almost any kind of soil, and should be planted in large enough quantities to insure plenty of this desirable fruit for the family. You may select varieties and obtain quantity prices.

SOUR CHERRIES

| | Each | Lots of 4 each |
|--|--------|----------------|
| 11/16 in. caliper, 5-6 ft., select..... | \$2.00 | \$1.95 |
| 9/16 in. caliper, 4-5 ft., standard..... | 1.75 | 1.70 |
| 7/16 in. caliper, 3-4 ft..... | 1.50 | 1.45 |

EARLY RICHMOND—Bright red. Earliest, and a good pie cherry.

ENGLISH MORELLO—Blackish red when fully ripe. Tart, but very rich for canning.

MONTMORENCY—Large, red. The best all-purpose cherry.

OSTEHEIM—Black when ripe. Red meat inside. Excellent for canning.

SWEET CHERRIES

BLACK TARTARIAN—A big purple-black sweet cherry of fine flavor. Very juicy.

BOHEMIAN SWEET CHERRY—Original tree came from Bohemia, was planted in Omaha, Nebr., where it bore its large luscious red fruit for many years. Tree is hardy, fruit larger than Montmorency; ripens some later.

YELLOW GLASS—Golden yellow. A hardy and productive sweet cherry.

| | | |

FRUIT TREES • Continued

Plums

We wish to call your attention especially to the Hansen Hybrids and Minnesota Hybrids. These varieties will produce an abundance of high quality fruit. Usually bear the second year after planting. You should arrange to plant some of these. You may make a selection of varieties and obtain quantity prices.

| | Each | Lots of 4 each |
|---|--------|----------------|
| 1 1/16 in. caliper, 5-7 ft., select | \$1.75 | \$1.70 |
| 9/16 in. caliper, 4-5 ft., standard | 1.50 | 1.45 |
| 7/16 in. caliper, 3-4 ft. | 1.25 | 1.20 |

MINNESOTA HYBRIDS

GOLDEN ROD—August. Large, yellow. Very hardy and productive. Good quality.

MONITOR—August. Large. Red, very hardy and productive. High quality.

UNDERWOOD—August. Large, rich, red, rather oval and juicy. One of the best.

GOLDEN EMBER—August and September. Good canning. Large rich golden yellow. Good keeper. Very hardy and productive.

SUPERIOR—Ripens over a long period. Large red fruit, yellow flesh, juicy and sweet. We recommend this variety.

NATIVE VARIETIES

OMAHA—August. Large, red and sweet. Productive and valuable.

HANSEN HYBRIDS

COMPASS—August. Cherry-Plum. Small fruit, dark red when ripe.

HANSKA—August. Large red, apricot flavor. Very good quality.

KAHINTA—August. Large red, yellow flesh. Very productive. Good quality.

OPATA—July. Medium size. Fruit purplish-red, with green flesh.

SAPA—July. Medium size. Fruit purple with red flesh. Juicy and very good.

TOKA—August. Large, red and very desirable. Similar to Hanska.

WANETA—August. Large, red and very productive.

**We Solicit Your Inquiries
for Varieties Not Listed.**

WANETA PLUM

PRUNES

WEBER PRUNE—Hardy European Prune that bears heavy in this locality. Fruit large and excellent quality. 5-6 ft., \$1.75 each; 4-5 ft., \$1.50 each; 3-4 ft., \$1.25 each.

Peaches

Next to Apples, Peaches are used for more purposes than most other fruits. Peaches picked from your own orchard are the finest flavored and best. One crop of fruit pays the grower many, many times the original cost of the trees. Peach can be profitably used as fillers in Apple orchards. We carry a long list of varieties and are listing only a few of the most popular.

| | Each | Lots of 4 each |
|---|--------|----------------|

Raspberries

LATHAM RASPBERRIES

Raspberries do well in most any soil. It is best to plant them where they are protected from the hot summer winds as they ripen in July. Raspberries are a very profitable crop.

CUMBERLAND—Black. One of the most reliable varieties, and widely planted. 2-year old. 5 for 80c; 10 for \$1.50; 25 for \$3.25; 50 for \$6.00.

CHIEF—Red. About ten days earlier than Latham; very productive. 5 for 80c; 10 for \$1.50; 25 for \$3.25; 50 for \$6.00.

LATHAM—Red. A fine fruit for home or market. Large fruit, bears heavily. 5 for 80c; 10 for \$1.50; 25 for \$3.25; 50 for \$6.00.

MORRISON BLACK RASPBERRY—This new raspberry is the largest ever grown. Has very few seeds. A vigorous grower and is rapidly gaining favor among berry growers. 5 for 80c; 10 for \$1.50; 25 for \$3.25; 50 for \$6.00.

CUMBERLAND

SODUS PURPLE RASPBERRY—This is the heaviest bearing of all raspberries. Does well in the Midwest and produced a good crop when many other varieties failed. Upright grower and produces large berries. This variety should not be overlooked as it is an all around berry and has a delicious flavor. 5 for 80c; 10 for \$1.50; 25 for \$3.25; 50 for \$6.00.

Strawberries

MASTODON

Home Grown JUNE-BEARING STRAWBERRIES

SENATOR DUNLAP—The best strawberry for home use. Large, well shaped berries of delicious flavor.

- Spirea Thunbergi
- †*Snowberry, White
- †*Snowberry, Red

ALMONDS (Pink or White)—A dwarf early flowering shrub. Branches covered with beautiful rose-colored flowers.

18-24 in.....\$0.75 2-3 ft.....\$0.90

BARBERRY (Red Leaved)—Red foliage, with red berries in the winter. Must be planted in the sun in order to bring out the color of the foliage.

12-15 in.....\$0.45 15-18 in.....\$0.60

18-24 in.75

BARBERRY THUNBERGI—Green leaved. A useful shrub for border and foundation planting. Leaves change to brilliant crimson scarlet and gold in the fall and red berries remain almost all winter.

12-15 in.....\$0.30 15-18 in.....\$0.40

18-24 in.50

BEAUTY BUSH—Blooms in early summer. Long arching branches covered with clusters of pale pink trumpet-shaped flowers.

18-24 in.....\$0.90 2-3 ft.....\$1.10

BUTTERFLY BUSH (Ile de France)—A perennial shrub dying to the ground in winter. Producing large flowers of rich reddish purple in long panicles.

No. 1.....\$0.60 3 for.....\$1.60

BUTTERFLY BUSH (Charming)—A new patented variety. Long sprays of lavender-pink blooms which are quite pink compared with other varieties of Butterfly Bush.

No. 1.....\$0.60 3 for.....\$1.60

THUNBERGI BARBERRY

Flowering SHRUBS

DOGWOOD (Goldentwig)—Yellow branches and canes. Small white flowers followed by silver berries.

2-3 ft.\$0.65 3-4 ft.\$0.80

DOGWOOD (Red Bark)—A favorite shrub because of the red bark on twigs and canes during the winter. Silver berries.

12-18 in.\$0.35 2-3 ft.\$0.65
18-24 in.50 3-4 ft.80

ELDER (Golden Leaved)—Bright yellow foliage throughout the summer. The berries attract the birds.

2-3 ft.\$0.65 3-4 ft.\$0.80

EUONYMUS, Alatus, Winged (Japanese Spindle Tree)—Yellow flowers, May-June. Interesting corky bark, leaves turning brilliant crimson in autumn, with bright red berries.

2-3 ft.\$1.25

EUONYMUS, atropurpureus, Wahoo—12-15 ft. Native, hardy, vigorous shrub or small tree producing an abundance of scarlet berries. Attractive colored foliage in autumn.

2-3 ft.\$0.65

HONEYSUCKLE BUSH

HONEYSUCKLE RED TARTARIAN—The most extensively used Bush Honeysuckle. Blooms freely and carries loads of bright red berries in midsummer.

18-24 in.\$0.50 2-3 ft.\$0.65
3-4 ft.80

FORSYTHIA

FORSYTHIA or GOLDEN BELL (Intermedia)—Early blooming shrub of a spreading habit of growth. Very free blooming.

18-24 in.\$0.50 2-3 ft.\$0.65
3-4 ft.80

FORSYTHIA FORTUNEI—Upright, tall-growing shrub. Branches arching and bearing clusters of golden yellow blossoms.

2-3 ft.\$0.65 3-4 ft.\$0.80

HONEYSUCKLE BELLA ALBIDA—Spreading shrub with large leaves and producing an abundance of white, fragrant flowers in spring. Red berries.

2-3 ft.\$0.65 3-4 ft.\$0.80

HONEYSUCKLE PINK TARTARIAN—Planted extensively, bearing heavily with pink blossoms, and producing large quantities of scarlet berries.

18-24 in.\$0.50 2-3 ft.\$0.65
3-4 ft.80

HYDRANGEA P. G.

HYDRANGEA PANICULATA GRANDIFLORA—Large showy panicles of creamy white flowers changing to rose, then purple and bronze. Blooms late summer.

12-18 in.\$0.60 18-24 in.\$0.75
2-3 ft. 1.00

HYDRANGEA ARBORESCENS GRANDIFLORA—Blooms in mid-summer. Blossoms resemble huge snowballs.

12-18 in.\$0.75 18-24 in.\$0.90
2-3 ft. 1.10

FLOWERING QUINCE (Cydonia Japonica)—Scarlet flowers appear before the leaves. A very popular shrub.

12-18 in.\$0.40 18-24 in.\$0.50
2-3 ft.65

Plumfield Flowering SHRUBS • Cont'd

LILAC

PHILADELPHUS GLACIER

LILAC PURPLE (Old Fashioned Lilac)—Purple blossoms in April and May.

18-24 in.....\$0.50 2-3 ft.....\$0.65

LILAC ROTHOMAGENSIS (Chinese)—A tall growing shrub with slender, arching branches producing purplish-red flowers.

18-24 in.....\$0.60 2-3 ft.....\$0.75
3-4 ft.....1.00

LILAC PERSIAN—Similar to Rothomagensis, except that the flowers are more nearly red.

18-24 in.....\$0.60 2-3 ft.....\$0.75
3-4 ft.....1.00

PHILADELPHUS, LEMOINE MOCKORANGE. 4-5 ft.—Semi-dwarf with attractive foliage, producing dense racemes of small fragrant white flowers.

12-18 in.....\$0.40 18-24 in.....\$0.60
2-3 ft......75

PHILADELPHUS VIRGINAL—Showy white, semi-double blossoms produced over a long season, beginning in May.

12-18 in.....\$0.65 18-24 in.....\$0.85
2-3 ft.....1.10

PRIVET, AMUR RIVER—See Hedging.

SNOWBALL—See Viburnum Opulus Sterilis.

SPIREA ANTHONY WATERER—A popular low-growing shrub, in bloom constantly all summer. Large, flat clusters of deep rose colored blossoms.

12-18 in.....\$0.60 15-18 in.....\$0.70
18-24 in heavy......80

SPIREA ARGUTA (Garland Spirea)—Upright growing shrub. Covered with small white flowers in early spring, before the leaves appear.

12-18 in.....\$0.40 18-24 in.....\$0.50
2-3 ft. heavy......75

SPIREA BILLARDI (Billard's Spirea)—Long feathery plumes of dainty pink. Blooms in mid-summer.

18-24 in.....\$0.50 2-3 ft.....\$0.65
3-4 ft. heavy......80

SPIREA FROEBELI (Froebel's Spirea)—Dwarf, vigorous grower. Young foliage tinged red, flowers rose color.

12-18 in.....\$0.45 18-24 in.....\$0.60
2-3 ft. heavy......75

SPIREA THUNBERGI—Graceful early flowering shrub. Pure white flowers, bright green feathery foliage.

18-24 in.....\$0.60 2-3 ft. heavy.....\$0.75

FRENCH LILACS

- Alphonse Laval, double lilac.
- Belle de Nancy, double rose, white center.
- Bleuatre, single bluish lavender.
- Chas. Joly, double reddish purple.
- Chas. X, single reddish violet.
- Lucie Baltet, single flesh pink.
- M. C. Perier, double creamy white.
- President Grevy, double bluish lilac.
- President Lincoln, single wedgewood blue.
- Varban, double lilac pink.

18-24 in.....\$1.00 Each
2-3 ft.....1.25 Each

PHILADELPHUS CORONARIUS (Sweet Mock Orange)—Tall growing, producing a profusion of large white, fragrant blossoms. Blooms in late spring.

2-3 ft.....\$0.65 3-4 ft. heavy......80

PHILADELPHUS GLACIER—Large, white flowers, very double, sweet scented. Shrub hardy, symmetrical and compact. Leaves bluish green. Does not grow as fast as standard varieties of Philadelphus, therefore more desirable for average garden or lawn.

18-24 in.....\$0.65 2-3 ft.....\$0.75
3-4 ft. heavy.....1.15

Plumfield Flowering SHRUBS·Cont'd

SPIREA VANHOUTTE

HIGH BUSH CRANBERRY

SNOWBALL

SPIREA VANHOUTTE—The most popular of all the Spireas. Arching branches covered with white blossoms, in spring.
 12-18 in.....\$0.25 2-3 ft.\$0.45
 18-24 in......35 3-4 ft. heavy......75

SYMPHORICARPUS RACEMOSUS (White Snowberry)—Pink flowers in mid-summer, followed by large berries of snow white color.
 2-3 ft. heavy.....\$0.60

SYMPHORICARPUS VULGARIS or CORALBERRY (Red Snowberry)—Dwarf native shrub. Loaded with red berries that remain on the branches all winter.
 18-24 in.....\$0.45 2-3 ft. heavy.....\$0.60

VIBURNUM OPULUS (Cranberry Bush)—Single white flowers in spring, followed by red berries that hang on almost all winter.
 18-24 in.....\$0.65 2-3 ft. heavy.....\$0.75

VIBURNUM OPULUS STERILIS (Snowball)—One of the best loved of spring flowering shrubs. Large ball-like clusters of flowers. Does not produce fruits or seeds.
 12-18 in.....\$0.60 18-24 in.....\$0.75
 2-3 ft. heavy..... 1.00

TAMARIX HISPIDA (Kashagar Tamarix)—Soft, feathery silver foliage. Bright pink flowers freely produced.
 18-24 in.....\$0.50 2-3 ft.\$0.65
 3-4 ft. heavy......85

HEDGING

A well cared for hedge brings to your home that distinguished touch of beauty and dignity. Formal hedges, such as Privet, should be pruned often throughout the summer.

Use the taller-growing Hedging shrubs to transform your back yard into an Outdoor Living-room with walls of living green. The tall hedge will give you privacy.

AMUR RIVER PRIVET

This is a lighter grade of stock than our standard grades but it is young, healthy stock and will do well.

PRIVET, ARMUR RIVER—These are used almost exclusively for hedges.

| | Per 10 | Per 25 | Per 100 |
|------------------------|--------|--------|---------|
| 12-18 inch light | \$1.50 | \$3.00 | \$11.00 |
| 12-18 inch heavy | 1.75 | 3.35 | 13.00 |
| 18-24 inch | 2.00 | 4.00 | 15.00 |

BARBERRY, THUNBERGI—Two-year-old seedlings.

| | Per 10 | Per 25 | Per 100 |
|------------------|--------|--------|---------|
| 9-12 inch | \$1.00 | \$2.25 | \$ 8.00 |
| 12-18 inch | 1.50 | 3.00 | 11.00 |

HONEYSUCKLE—Makes a good tall hedge.

| | Per 10 | Per 25 | Per 100 |
|------------------|--------|--------|---------|
| 12-18 inch | \$2.00 | \$4.00 | \$15.00 |
| 18-24 inch | 2.50 | 5.50 | 20.00 |

MULBERRY—(See Seedlings, page 11.)

| 18-24 inch | 2.50 | 5.50 | 20.00 |

Plumfield SHADE

CUTLEAF WEEPING WHITE BIRCH

BIRCH, CUT LEAF WEEPING—A tall white-barked tree with gracefully drooping branches. Leaves deeply cut.

| | |
|---------------|--------|
| 5-6 ft. | \$3.00 |
| 6-7 ft. | 4.00 |
| 8-10 ft. | 5.50 |

ASH, AMERICAN GREEN—Tall growing tree. Foliage dark green, changing to gorgeous shades of purple and yellow in fall.

| | |
|---------------|--------|
| 5-6 ft. | \$1.00 |
| 6-8 ft. | 1.40 |
| 8-10 ft. | 2.00 |

AMERICAN ELM

ELM, AMERICAN WHITE—The grandest of all trees for this region. Tall wide-spreading tops.

| | |
|---------------|--------|
| 5-6 ft. | \$1.00 |
| 6-8 ft. | 1.40 |
| 8-10 ft. | 1.75 |

ELM, CHINESE—A rapid growing tree with slender branches covered with dark green foliage. Does well in dry territory. Prices listed here are for transplanted trees.

| | |
|---------------|--------|
| 4-5 ft. | \$0.50 |
| 5-6 ft. | .75 |
| 6-8 ft. | 1.00 |
| 8-10 ft. | 1.40 |

ELM, VASE—A budded form of Elm, with graceful vase shape. Good for landscape and street planting.

Same grades and prices as Moline.

MOLINE ELM

MOLINE ELM

The Moline Elm is a budded tree and is recommended for street and yard plantings where uniform trees are desired. Habit of growth is pyramidal. Very attractive large, waxy green leaves.

| | |
|----------------|--------|
| 5-6 ft. | \$1.50 |
| 6-8 ft. | 2.00 |
| 8-10 ft. | 2.50 |
| 10-12 ft. | 3.25 |

HACKBERRY

HACKBERRY—Grows into a large tree, with luxuriant foliage. Limbs are seldom broken by wind.

| | |
|----------------|--------|
| 5-6 ft. | \$1.00 |
| 6-8 ft. | 1.50 |
| 8-10 ft. | 2.00 |
| 10-12 ft. | 3.00 |

LINDEN, AMERICAN (Basswood)—A tree of beautiful form and size, good for street or lawn planting. Fragrant, yellow flowers affording nectar for bees.

| | |
|----------------|--------|
| 5-6 ft. | \$1.60 |
| 6-8 ft. | 2.50 |
| 8-10 ft. | 3.00 |
| 10-12 ft. | 4.50 |

REDMOND LINDEN, Grafted tree, Crimean Basswood—Has an exceptionally straight trunk with branches growing close together on the trunk, making it very compact. Is a beautiful lawn or street tree.

| | |
|----------------|--------|
| 5-6 ft. | \$1.75 |
| 6-8 ft. | 2.50 |
| 8-10 ft. | 3.25 |
| 10-12 ft. | 4.75 |

REDMOND LINDEN

We Invite You to Visit Our
Nurseries and Sales Grounds.

TREES *Fremont, Nebraska*

Grown in nursery rows, root pruned, transplanted and spaced to insure best root system and specimen trees.

Where caliper grades are shown, as 1 inch, 2 inch, 3 inch, etc., it means the diameter six inches above the ground.

HARD MAPLE

DECIDUOUS TREES WINDBREAKS

You will find varieties and prices listed on page 10.

LOCUST, THORNLESS HONEY—Same as Honey Locust but thornless. Makes a very good street or shade tree.

| | |
|---------------|---------------|
| 5-6 ft. | \$1.35 |
| 6-8 ft. | 2.00 |
| 8-10 ft. | 2.75 |

MAPLE, NORWAY—A round topped tree of beautiful appearance. Foliage of deep, rich green.

| | |
|---------------|---------------|
| 6-8 ft. | \$2.50 |
| 8-10 ft. | 3.50 |

OAK, RED (Quercus rubra.) 60-80 ft.—An excellent tree for park and street planting. Beautiful foliage turning red in autumn.

| | |
|---------------|---------------|
| 5-6 ft. | \$2.00 |
| 6-8 ft. | 3.00 |
| 8-10 ft. | 4.00 |

PIN OAK

RUSSIAN OLIVE—Attractive, silvery gray leaves and grayish-white berries. Used frequently for hedges and windbreaks.

| | |
|--------------|---------------|
| 5-6 ft. | \$1.50 |
| 6-8 ft. | 2.00 |

BLACK WALNUT—A valuable tree for wood, lumber and nuts.

| | |
|---------------|---------------|
| 6-8 ft. | \$2.50 |
| 8-10 ft. | 3.00 |

LOMBARDY POPLAR

POPLAR, LOMBARDY (2 Year)—A tall, pyramidal tree, limbs from the ground up. Fine for screens, and does not seed.

| | |
|----------------|---------------|
| 5-6 ft. | \$0.60 |
| 6-8 ft. | .75 |
| 8-10 ft. | 1.00 |
| 10-12 ft. | 1.35 |

POPLAR, YELLOW COTTONWOOD—A fast growing tree, and very hardy. Useful for windbreaks and shelter belts. Excellent lumber tree.

| | |
|---------------|---------------|
| 6-8 ft. | \$0.75 |
| 8-10 ft. | 1.00 |

SILVER WHITE POPLAR—Well known as Silver Poplar, spreading habit, leaves woolly white underneath, very hardy, succeeds in cold dry climate.

| | |
|--------------|---------------|
| 2-3 ft. | \$0.50 |
| 3-4 ft. | .60 |

NIOBE WEeping WILLOW

WILLOW, NIOBE WEeping—Bark on twigs and branches of a golden yellow color, giving the tree a handsome appearance both winter and summer.

| | |
|--------------|---------------|
| 3-4 ft. | \$0.50 |
| 4-5 ft. | .75 |

WILLOW, PUSSY—Small tree, with catkins on the branches in early spring.

| | |
|----------------|---------------|
| 18-24 in. | \$0.50 |
| 2-3 ft. | .65 |
| 3-4 ft. | .80 |

Plumfield Ornamental Flowering Trees

PRUNUS TRILOBA

PRUNUS TRILOBA (Flowering Plum)—A profusion of handsome, double pink flowers. Vigorous shrub or small tree.
 2-3 ft. \$1.25
 3-4 ft. 1.50

PRUNUS, CISTENA (Hansen's Purple Leaved Plum)—Dwarf grower, with rich purple-red foliage. Pink flowers and purple fruit.
 18-24 in. \$1.00
 2-3 ft. 1.25
 3-4 ft. 1.50

 6-8 ft. 1.75

CRAB, RED SILVER. 18-20 ft.—Fruit rich maroon red, foliage somewhat cut-leaved with silver and red color. A remarkable combination.
 3-4 ft. \$1.25
 4-5 ft. 1.50
 5-6 ft. 2.00

FLOWERING CRAB

RED BUD—Small native tree. Pinkish red flowers appear in spring before the leaves.
 18-24 in. \$0.60
 2-3 ft.85
 3-4 ft. 1.25

FRUIT TREES AND FRUIT PLANTS
 PAGES 11 TO 17

HOW TO PLANT

In planting in yard, garden, or field, the ground should be well prepared, and stock should be handled with least possible exposure. We offer the following suggestions on some of the more important plants.

How to Plant Roses

How to Plant Balled Evergreens

Wrong Way

Right Way

To determine the number of plants required per acre for any distance multiply the two plant distances and divide the product into 43,560 (the number of square feet per acre).

PLANTING DISTANCE OF FRUIT TREES

| | Usual recommended distance | Best average distance | Number Per acre at average distance | | Usual recommended distance | Best average distance | Number Per acre at average distance |
|----------------------|----------------------------|-----------------------|-------------------------------------|--------------|----------------------------|-----------------------|-------------------------------------|
| Apple | 25 to 32 feet | 30x30 feet | 48 | Blackberry | 1 1/2 to 3x7 feet | 2x7 feet | 3110 |
| Plum and Apricots | 16 to 22 feet | 20x20 feet | 108 | Gooseberry | 4x6 feet | 4x6 feet | 1815 |
| Pear | 22 to 30 feet | 25x25 feet | 69 | Currant | 4x6 feet | 4x6 feet | 1815 |
| Cherries and Peaches | 12 to 16 feet | 14x14 feet | 147 | Grape | 8x8 feet | 8x6 feet | 680 |
| Raspberry—(Hill) | 4x6 or 5x5 feet | 4x 6 feet | 1815 | Strawberry— | | | |
| (Hedge) | 1 1/2 x 3 by 6 to 7 feet | 2x 6 feet | 3630 | Everbearing | 15 to 18 in. x 3 to 4 ft. | 1 1/2 x 3 feet | 9680 |

POLYGONUM AUBERTI (China Fleecevine or Lace Vine)—Large feathery sprays of creamy white flowers produced in late summer and fall. Rapid grower.
2 year.....\$0.60 3 year.....\$0.75

We Solicit Your Inquiries for Varieties Not Listed.

Plumfield ROSES

HYBRID TEA ROSES

PINK RADIANCE

PINK DAWN

PICTURE

Roses are scarce this year and will be for some time. Therefore we suggest that you place your order early as the supply will not take care of the demand. When our present supply is exhausted we will not be able to replenish and would appreciate your listing substitute varieties in the event we do not have all the varieties you desire. While our list of varieties is small in comparison to the many varieties offered on the market today, we feel certain what we do list will serve you best in this territory.

Plumfield's hardy 2-year-old field grown roses will bloom the same year they are planted.

Be sure to read our Planting Instructions, "How to Plant Your Roses." This is important if you expect to get a good survival.

How to Plant Roses.

How To Plant Your Roses

To obtain success in planting roses it is important that they are properly planted. The roots should be trimmed back some and the hole dug large enough so that roots will not be crowded. Place the plant in the hole so that the bud union above the roots is—at least two inches below the level of the ground, then fill in around the roots with dirt and water in well. After the water has seeped away, cut each cane back to about four inches above the level of the ground and cover the plant over completely with a mound of earth. After about six inches of new growth has forced through the mound of earth you can hoe the mound away gradually.
